

Henry Perkins — WordPress Support Engineer

WordPress • Gutenberg • REST/HTTP/DNS • Defect reproduction • Fix validation • Customer communication

Chicago, IL • hperkins@gmail.com • hperkins.blog • [GitHub](https://github.com/hperkins)

WORDCAMP US 2026 — Phoenix • Staffed the Core AI booth, walking maintainers and agency developers through AI provider tooling

WordPress support professional with prior WordPress.com support experience, current independent client delivery, and upstream WordPress contributions. Reproduces defects, tests fixes, and reports findings to customers and engineering.

EXPERIENCE

Independent Technology Consultant — Lakefront Digital | Oct 2022–Present • Chicago, remote

Delivery scope — WordPress builds, API integrations, and documentation from discovery through post-launch support.

Client launch — Delivered [DJ Lee & Voices of Judah](#)'s booking-focused website from discovery through launch, including server-side booking validation and [publicly available source code](#).

Automattic — Happiness Engineer | WordPress.com • Remote • Oct–Nov 2012

Resolved WordPress.com issues across publishing, configuration, billing, domains, and DNS, turning recurring problems into documentation and reproducible bug reports for customers, product, and engineering.

SELECTED WORDPRESS INVESTIGATIONS & CONTRIBUTIONS

Defect reproduction — Reported and reproduced a WordPress AI Guidelines defect ([Issue #529](#)): an artifact guideline could shadow the content guideline. A maintainer's fix, [PR #593](#), shipped in [WordPress AI 1.0.1](#).

Fix validation — Reported a WordPress AI request-logging gap ([Issue #732](#)); integration-tested Anubhav Anand's proposed fix ([PR #757](#), open), found duplicate successes and missing failures, and proposed the ownership split.

Documentation — Wrote and refined the Content Resizing and Title Generation experiment documentation in [WordPress/ai PR #501](#); merged May 18, 2026 and credited in the 1.0.0 release notes.

Compatibility fix — Directed and reviewed an AI-assisted fix so the OpenAI provider advertises sampling options only for models that accept them, with tests: [WordPress/ai-provider-for-openai PR #40](#), merged Aug 16, 2026.

Input validation — Directed and reviewed an AI-assisted contribution that rejects NAN and infinite embedding values, with a regression test for each: [WordPress/php-ai-client PR #263](#), open contribution.

SELECTED PROJECTS

Independent projects developed with AI assistance under my direction and review; public tagged releases.

Flavor Agent — Creator | WordPress agent-governance plugin

[v0.1.0](#) released Aug 26, 2026. Provides validation, admin approval, audit records, and undo workflows for supported AI-proposed WordPress changes.

AI Provider for Codex — Creator | independent WordPress plugin

[v2.1](#) released: connects Codex text and image generation to the WordPress AI Client through a local sidecar.

HPerkins Tokens — Creator | WordPress block theme behind hperkins.blog

[v0.3.53](#) released • hperkins.blog. WordPress block theme with token-based editor controls and verifier scripts for content, typography, and accessibility checks.

TECHNICAL SKILLS & ADDITIONAL EXPERIENCE

Code investigation and review: PHP, JavaScript, Gutenberg, REST API, WP-CLI • Support: HTTP, DNS, CSS, browser debugging, escalation triage • Tooling: Git/GitHub, GitHub Actions, Plugin Check, PHPStan, Cloudflare Workers.

Developer community — PageLines Developer Community Manager (May–Oct 2012): onboarding content, tutorials, and day-to-day developer relations, turning community feedback into clearer product guidance.

Customer and operations roles — Starbucks Shift Supervisor (2019–2022); Sodexo Starbucks Manager (2018–2019); Clinique Consultant (2015–2017); Micro Center Customer Service/Sales (2009–2012).
